Hi Tim. I'd be happy to grant that permission.

I've attached the final version, 1.3, in case you don't have it.

Best wishes,
Mark

Hello Mr. Shepard,

I'm writing to ask whether you would be willing to give permission for anyone to use your MorePerfect shareware for WordPerfect for DOS.

You might be surprised to know that there is still quite a vibrant community of WordPerfect for DOS users and further, that there is an entire website dedicated to the program (<https://mendelson.org/wpdos>)! Quite a few people who, like you, designed shareware for what was the preeminent word processing product of its day, have donated their products to the site for people to use.

If you would consider donating (giving permission to use) MorePerfect, I would be grateful.

Thanks in advance,
Tim Garner
San Diego, CA

P.S. Happy Thanksgiving!!
